

TIME™ Program Research: Articles and Guidelines Published or In Press

1. Alsbury-Nealy K, Scodras S, Colquhoun H, Jaglal SB, Munce S, Salbach NM. Exploring the role of healthcare partners in referrals to a community-based exercise program with a healthcare-community partnership designed for people with balance and mobility limitations. 2024. Disability and Rehabilitation. Available from: <https://doi.org/10.1080/09638288.2024.2390045>.
2. dos Santos RB, Lin J, Badwal A, Singh H, Jaglal SB, Sperling C, Salbach NM. Evaluations of virtual exercise programmes for adults with mobility limitations: a scoping review protocol incorporating an equity lens to inform the development of strategies to optimise participation of under-represented groups. BMJ Open 2024;14:e077961. Available from: doi: 10.1136/bmjopen-2023-077961.
3. Bercovitch D, Reppas-Rindlisbacher A, Mulvihill S, Ng H, Patel S, Sum B, Aitken L, O'Neill M, Salbach NM, Aravind G. Losing ground following community exercise program closures: A qualitative descriptive study of the impact of COVID-19 related pandemic restrictions on exercise participation, physical activity, and health of older adults with balance and mobility limitations. Physiotherapy Canada. 2024. Available from: <https://doi.org/10.3138/ptc-2023-0049>.
4. Aravind G*, Bashir K*, Cameron JI, Bayley MT, Teasell RW, Howe J, Tee A, Jaglal SB, Hunter S, Salbach NM. What matters to program partners when implementing a community-based exercise program for people post-stroke? A theory-based qualitative study and cost analysis. Frontiers in Rehabilitation Sciences. 2023;4:1064206. Available from: <https://doi.org/10.3389/fresc.2023.1064206>. *Co-first authors.
5. Aravind G, Graham ID, Cameron JI, Ploughman M, Salbach NM. Conditions and strategies influencing sustainability of a community-based exercise program incorporating a healthcare-community partnership for people with balance and mobility limitations in Canada: A collective case study of the Together in Movement and Exercise (TIME™) program. Frontiers in Rehabilitation Sciences. 4:2023. Available from: <https://doi.org/10.3389/fresc.2023.1064266>.
6. Alsbury-Nealy K, Colquhoun H, Jaglal SB, Munce S, Salbach NM. Referrals from healthcare professionals to community-based exercise programs targeting people with balance and mobility limitations: an interviewer-administered survey. Physiotherapy Canada. 2023. Available from: <https://doi.org/10.3138/ptc-2022-0069>.
7. Alsbury-Nealy K, Scodras S, Munce S, Colquhoun H, Jaglal SB, Salbach NM. Models for establishing linkages between healthcare and community: a scoping review. Health and Social Care in the Community. 2022. Available from: <http://doi.org/10.1111/hsc.14096>.
8. Reszel J, van den Hoek J, Nguyen T, Aravind G, Bayley MT, Bird M-L, Edwards K, Eng JJ, Moore JL, Nelson MLA, Ploughman M, Richardson J, Salbach NM, Tang A, Graham ID. The Stroke Recovery in Motion Implementation Planner: Mixed-methods user evaluation. JMIR Formative Research. 2022;6(7):e37189. Available from: <https://doi.org/10.2196/37189>.

9. Reszel J, van den Hoek J, Nguyen T, Aravind G, Bayley MT, Bird M-L, Edwards K, Eng JJ, Moore JL, Nelson MLA, Ploughman M, Richardson J, Salbach NM, Tang A, Graham ID. How community-based teams use the Stroke Recovery in Motion Implementation Planner: Longitudinal qualitative field test study. *JMIR Formative Research*. 2022;6(7):e37243. Available from: <https://doi.org/10.2196/37243>.
10. Aravind G, Bashir K, Cameron JI, Howe J, Jaglal SB, Bayley MT, Teasell RW, Moineddin R, Zee J, Wodchis WP, Tee A, Hunter S, Salbach NM. Community-based exercise programs incorporating healthcare-community partnerships to improve function post-stroke: feasibility of a 2-group randomized controlled trial. *Pilot and Feasibility Studies*. 2022;8:88. Available from: <https://doi.org/10.1186/s40814-022-01037-9>.
11. Elizabeth L. Inness, Gwen Brown, Alda Tee, Liam Kelly, Jason Moller, Gayatri Aravind, Cynthia Danells, and Nancy M. Salbach. Canadian Stroke Community-based Exercise Recommendations 3rd Edition, 2020. Canada. The full guideline “Canadian Stroke Community-based Exercise Recommendations Update 2020: A Resource for Community-based Exercise Providers” and companion guide “Choosing a Community Exercise Program After Stroke” are available at: <https://kite-uhn.com/can-stroke-community-based-exercise-recommendations>.
12. Skrastins O, Tsotsos S, Aqeel H, Qiang A, Renton J, Howe J, Tee A, Moller J, Salbach NM. Fitness coordinators’ and fitness instructors’ perspectives on implementing a task-oriented community exercise program within a healthcare-recreation partnership for people with balance and mobility limitations: a qualitative study. *Disability and Rehabilitation*. 2020;42(19):2687-2695. Available from: <http://dx.doi.org/10.1080/09638288.2019.1570357>.
13. Merali S, Cameron JI, Barclay R, Salbach NM. Experiences of people with stroke and multiple sclerosis and caregivers of a community exercise programme involving a healthcare-recreation partnership. *Disability & Rehabilitation*. 2020;42(9):1220-1226. Available from: <https://doi.org/10.1080/09638288.2018.1519042>.
14. Salbach NM, Howe J, Baldry D, Merali S, Munce SEP. Considerations for expanding community exercise programs incorporating a healthcare-recreation partnership for people with balance and mobility limitations: a mixed methods evaluation. *BMC Research Notes*. 2018;11:214. Available from: <https://doi.org/10.1186/s13104-018-3313-x>.
15. Merali S, Cameron JI, Barclay R, Salbach NM. Characterising community exercise programmes delivered by fitness instructors for people with neurological conditions: a scoping review. *Health & Social Care in the Community*. 2016;24(6):e101-16. Available from: <https://doi.org/10.1111/hsc.12282>.
16. Lau C, Chitussi D, Elliot S, Giannone J, McMahon MK, Sibley KM, Tee A, Matthews J, Salbach NM. Facilitating community-based exercise for people with stroke: cross-sectional e-survey of physical therapy practice and perceived needs. *Physical Therapy*. 2015;96:469-478. Available from: <https://doi.org/10.2522/ptj.20150117>.
17. Salbach NM, Howe J, Brunton K, Salisbury K, Bodiam L. Partnering to increase access to community exercise programs for people with stroke, acquired brain injury and multiple sclerosis. *Journal of Physical Activity and Health*. 2014;11:838-845. Available from: <https://doi.org/10.1123/jpah.2012-0183>.

Lead Investigator

Nancy Salbach, PT, PhD
BSc Physiology, BScPT, McGill University
MSc Rehab Science, McGill University
PhD Epidemiology, McGill University
Postdoctoral Research, University of Toronto
